contact

Do you sometimes wish you had a megaphone to make an announcement
to people nearby, or a wing guy to help break the ice?
Well, soon you will have an App for that!

This col. Is my comments tonight
(May 10 USA, 10 PM This column
is document index6.

Contact email address:
shoutaut@gmail.com

Suggestion: This section is shown
for 1 to 2 seconds. Then, it slides
up "under the title bar" and the
below second section is shown.

(Since we don't have time, I
suggest using these icons. The
bullhorn is optional (it might not be
good taste)

The fact that the zone is shaped
irregular is cool. No one does
that. They use circle or just a "1
mile" radius, or inside the store.

(BTW: Logo idea: The ShoutAut
logo to be a simplified version

(i.e. not too colorful) of the
smiley.

**This is an alternate
idea for the landing
page. It is up to
designer.**

the above is moved up, this is shown.

Welcome. Vote for ShoutAut at <http://bit.ly/shoutaut>. Also, shoutaut to a friend to vote for us.

(However! Nice to have: If the user tugs at the page downward, the above page will slide down again. Some physics would be nice too)

I am taking out the reference to posting to "other locations". We will hold that in stealth.

After May 16, we will make additions to the screens. We will make "animations". Tyler (Graphics artist) will prepare Powerpoint animations.

These are preliminary designs, and button styles and positions will be changed, and are to be modified. They are here as FYIs. Thank you.

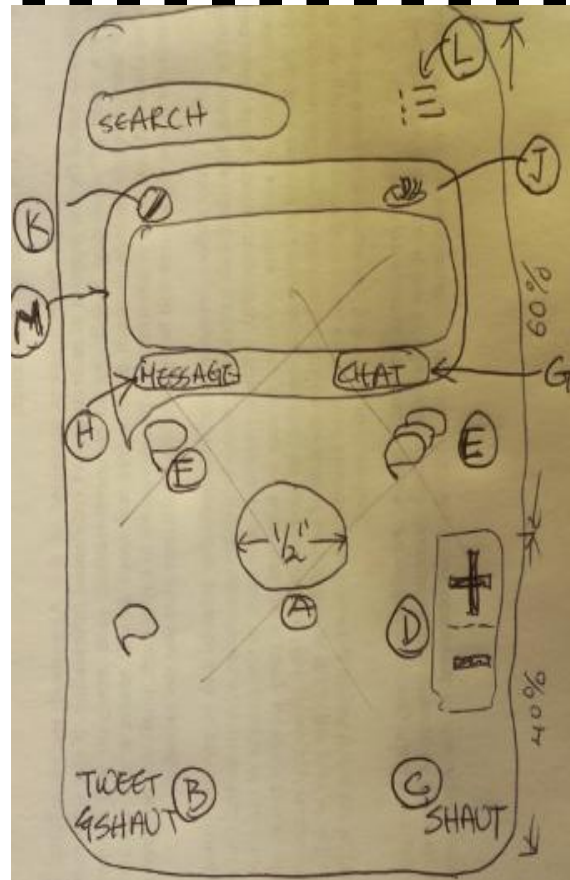

Post at any location or event, and chat or message with anyone.

Create a zone for the posting to make it visible only by the people in the zone.

When the Poster leaves the zone, or "after midnight", the postings can be deleted from our servers.

Registered users can personalize, upload photos, and stylize their Postings.

(pat. pending.)

Please take our poll.

We have the idea to set aside 1% to 9% of our company equity for future charity and community use purposes. What percentage? (Vote to see the current votes.)

1%	2%	3%	4%	5%	6%	7%	8%	9%	Enter
1	22	61	4	44	63	55	66	77	Total

(This patent was added tonight)

I have the notion to put this in. and keep it in after the contest.

Also, the total bar is hidden until the visitor has voted.

(We have to lock their Ip so that they can only vote once.)

Shoutauteers

Hi y'all. Thank you for visiting our alpha site. Michael does the dishes to the ideation. Vote for us; do the poll above; and ask or post a thought at right.

Tyler helps Michael with the ideations, always with a straight face. He does UX/graphics and is a trained industrial designer.

Stefano does painting to plumbing; have been designing systems for a long time and penguins are his best friends

Give us a ShoutAut! (Visitors count: _____)

Admin may edit or remove.

()Mike	()Tyler	()Stef	()Damian	()Randall
--------	---------	--------	----------	-----------

This message box is fixed, it does not get much bigger, if we are going to add the poll below.

Visitor count is optional.

This bar is optional:

The location of the poster will require some heavy location data gathering, thus we don't do that for context.

Also 5 guys here might be overkill. I am thinking to reduce our head count to 3. Most of the other contestants are 1 to 2 people teams. And it seems so far, less than 10% even have web site! (I am sure they will update their submissions over next week).

We will use one of the avatar

Damian is the go to guy here. He loves hackathons and tinkers with mobile app ideas. Ask Randall about geolocation algorithms. He is doing indoor mapping for malls and has worked on blind aerial guidance systems (DOD stuffs) using sensors to measure inertia, wifi routers and cell towers.

styles--- TBD in 24 hours. (to Shri)

(Suggest to limit the comment area to about 5 lines; newest on top is ideal, but whichever is fast. Also, we may have to not have the option showing the commenter's location – unless it is automated and easy to do.))

For news and to be invited for ShoutAut beta testing, enter your email address here: _____ (Enter button)

We can use mailchimp to capture the emails.
(This can be done after May 16th, if no time)
