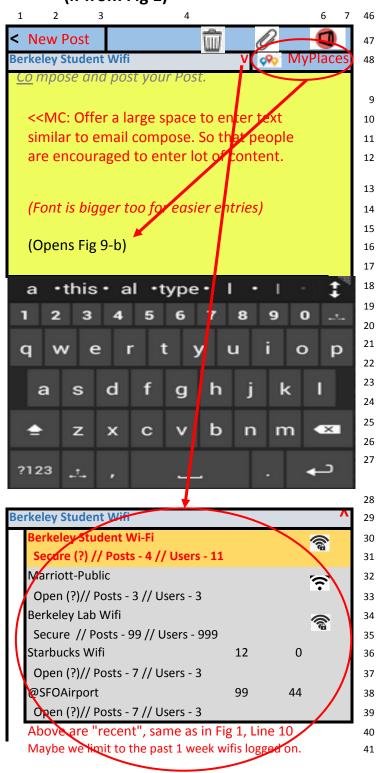

Fig 2: The Chat's full Post and Thread (if any)

(Opens Fig 4b or a slide out)

Confidential and private document.

Fig 4: Post compose. (if from Fig 1)

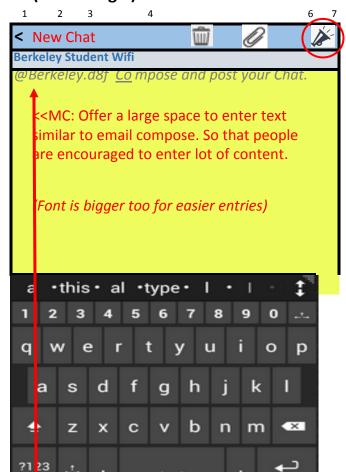

Diego: And optional icon for MyPlaces?

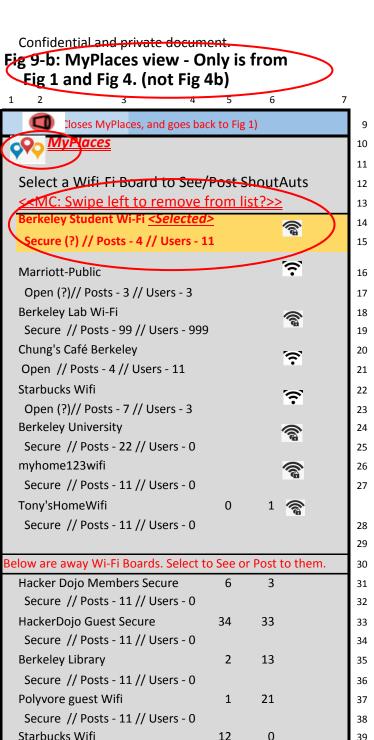

Fig 4b: Chat compose. (if from Fig 2)

"@Berkeley" is the chat beging replied to. In the above example, the System has inserted that, because the user had long pressed the Post (Top-Chat/Post) or one of the other Chats at Fig 2.

User can move the cursor to remove it.

Below are away WI-FI Boards. Select	to see o	r Post to i	mem.

<<MC: The reason why decided to only allow the user to See/Post to one wifi at a time, is simply that it seems bit complex to work out, and is not a MUST HAVE for the beta.

we don't have room for more/larger words at the top in Fig 1, line 11>> <<MC: We will take the first word, add a dot, and 3 to 5 random characters to make their Handle. (If they give the 2 words.) This is optional, user can do it any time
