Remarks (Sept 20. 3 Pages.)

This is my attempt for the Net New. I.e. to focus the features "only" on what is new. That is the board and posting. Also, I believe the Share and #hashes are important.

The Blue highlights are the NEW. The Chat Board is gone! But, I added the Share and #hash (so that if the Board creator or Posting puts a #hash in, then they are indicating that anyone with that #hash can follow/participate on the Board/Posting, even if never visited the site.

Also, I decided to fix the radius to 300 yards. One reason is that the ole European town squares are 300 meters long. That is the distance that human eye can pick out another human at the far end.

(BTW: The Blue colored boxes inside the Board and Posting Compose and Chat are where the User inputs their content.)
