ShoutAut to anyone anyplace anywhere, indoor events to outdoors.

ShoutAut to anyone anyplace anywhere ™

Welcome to our new beta page.

Google images search:
google 3d map with pins, etc. etc.
to see a better image than the globe.
Or if you have totally different idea for this home page.
An idea is to get rid of this page totally, and just start with the phone image second below.

A compromise is to show this page, but to make it last on 1 second and have it replaced by the phone image page.

Stefano, Damian: We have to get Facebook and Twitter linked here. Or at least Facebook.

(maybe all three to be on same level, i.e. phone/mega phone is at middle of globe, but glove seems too heavy of a feel here.)

Tyler, the background in very light style could be a map for this page.

Then, for phone page, indoor in 3D, etc. E.g. the phone can be in a box and the background is the indoors.

another design idea (google images: mobile phone cartoon images; I like this. Its simple, but I don't like duplicting with the iamge at the upper left corner, if we do use smiley here, we will delete at top left and just use ShoutAut.)

Please vote now for ShoutAut at www.coshx.com/-----------.
Click on the link, go to ShoutAut on the list and vote for us. Thank you.
Please give a ShoutAut to your friends to ask them to vote for us too.

(This ought to be visual, appropriate colors)
The design art is in how and what styles to make this "your vote is important" message in so that people see it and notice it.

I like the explanations in the green to be right alone the left side. I think the way I have it good and easy to read.

Damian:
I want ask you to do the following – as you can. A) immediately

Post nearby or to any location or event,

chat or message with people nearby

or at other location or event,

indoors or outdoors.

Optionally, make a zone around the post
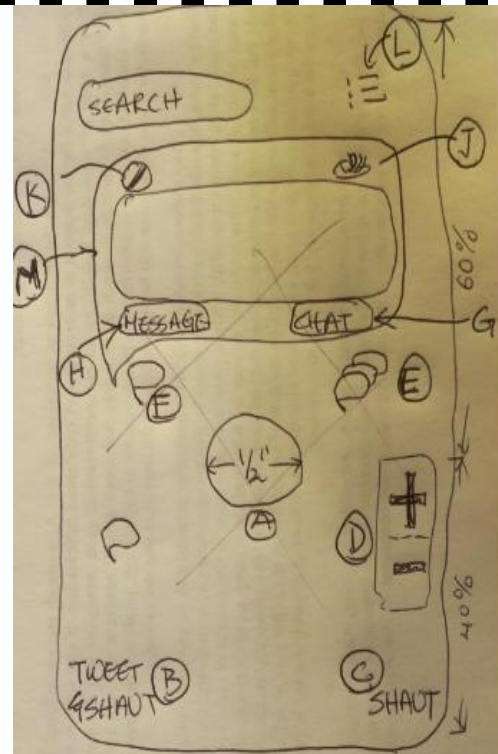

so that the it is visible

only by the people in the zone.

Use the search box for other locations.

Please post and chat responsibly.
ShoutAut is anonymous.
Postings are removed from the server at expiration.

mocks for the context and B) eventually has you can working version for VCs. These to show and make your app to have our core differentiators (post at another location; and the zoning).

1. First screen is everything here except for the M dialogue bubble. Then, we can progress, as in slides. (Nice2have-the user's circle A (1/2 inch) glows once.)
2. Nice2: Then Shaut C glows and the M Post bubble is shown, (F is the small icon F that "grows" to become M). If both of these are bit of work, then we just overlay the M on top of the min screen.
3. Then, M is filled with the first of the 5 sample Postings. (the index 3 document. "Ride share for the Big game this weekend wanted - anybody going?". The posts last 2 seconds, and the next one shows inside the box).
4. Nice to insert after 1st Posting: H glows and small dialogue opens up showing "Private message to Poster or a group"; and then, G glows and "Open chat with all".
5. Or anytime, if user mouse over H or G, then a small popup message can be displayed: If H: "Private message to poster or a group"; if G: "Open chat with all".
6. BTW: Nice to have: if user clicks on Shaut, it advance the sample posting into the next one, etc.
7. Also please try to break up the words in the green at the left of the image, the way I have it.
8. K is that red circle with bar in in; J is the two hands applauding (since we are public posting, we are using applaud not thumb up)
9. I prefer to have B Tweet and Shaut and C Shaut as letters.
====================
10. For posting 4 and 5, we want to highlight the zoning. Either the ½ zone gets bigger, say 2 inches diameter on this map. Or we show a college campus (we can do that for both) and show that under the 2 inch circle, and inside the circle "only people in this zone will see the posting"
11. Bonus: if for #5, the circle is shaped like a cloud or a soft square, etc. to show that the zone shape can be changed. (But, that is best for indoors, but GSP is still doable?)
12. D the Zoom + - is only shown if we are going to demo a zone creating screen. If not we don't it need here.

Postings

1. Ride share for the Big game this weekend wanted - anybody going?".
2. Bike for sale. Rally 2000. Almost new.

3. Kappa Sigma Fraternity Open House tonight! (Put the image in the Posting)
4. A big shoutout to all the volunteers, who made our event so successful. All are invited at 7pm for a bash
5. Hi Sweetheart, happy anniversary! (A flower image) – zone or no zone.

The design art is in how and what styles to make this "your vote is important" message in so that people see it and notice it.

For mobile, the chat section will move under the Shouteers.

Please send me like 2 possible thumnailes of you photos if you have. We will just use our first names here. And/or edit you descriptions.

Please vote for us! To be hyperlinked to the vote page Coshx.com will require that all voters have Facebook. Thus, college and younger people are best.

mapping for some of the largest malls, have Pix implemented blind aerial (DOD stuffs) guidance systems. Ask me if you have questions or want to know anything about positioning.
